IMPORTANT TO THE PUBLIC!
 THE following advertisement was published in May, 1918, in the "Boston Daily Times," and various other newspapers in the United States: "I am a Scientist. I am the owner of a new and useful device, namely, a new and improved method of my 'PATENT STATIONARY CUTTER PLANNING, TONGUEING AND GROOVING MACHINE,' throughout the United States:

"PLANING MACHINES.
 "I take this method of answering the frequent inquiries by letter and otherwise, as to my opinion, upon the most favorable grounds, of the merits of my new and improved method through the agents of the Stanley Knife Works

[illegible]

I deny that any person ever saw or heard of such a machine as mine until I invented the same. Said machine was operated in the month of August, 1876, at the Centennial Exposition in Philadelphia, and it did as well as other machines of the kind for the above advertisement, and in order that the public may be named of what I mean what say, I will offer to sell ONE THOUSAND DOLLARS' amount in equal payment from said Wilson, that ONE of my machines will plane, or pare, round, or square, or cut, or turn, or finish, or joint, or bore, or drill, or do it as well, or better than any of the "Woodworth" machines. The trial to be made at my House No. 10, Porter St., East Boston, Mass., or at such other place as may be convenient for such a trial.

JOSEPH F. WOODWORTH,
Inventor.

W. S. D. S.
